Who we are and where do we operate?

THE ABILITY PEOPLE (TAP), is a Fourteen years old non-profit, Non-Government and Disable People's Organisation in Visakhapatnam (called City of Destiny), promoting 3Rs i.e., Road safety, Right to emergency care & Rehabilitation of crash victims.

What we do: Help (CwSN), People with Disabilites(PwDs) & People with Spinal Cord Injuries(PwSCI) in India focusing on their **survival**, **mobility**, **empowerment** & **inclusion.**

Why we do it: To enable PwDs to participate in society as equals. PwSCI is one of the largest groups of un-served and marginalized people.

Our First Programme initiative: Ability Rehabilitation Center(ARC), a post-hospital rehabilitation center, provides services for active rehabilitation for persons with spinal cord injuries (prime focus) along with other forms of disabling conditions like amputees, post-polio residual paralysis (PPRP), muscular dystrophy, children with cerebral palsy, spina bifida, adults with strokes and other neurological disorders and others.

History/Background of the organization

TAP was started by a group of persons with spinal cord injury headed by the founder Secretary Mr. Dilip Patro, Software Engineer and a wheelchair user after SCI (Spinal Cord Injury). Our society is an association of Persons with Disability and a non govt. organisation whose main objective is promotion of welfare of persons with disability -highlighting such issues as health, education and training, accessibility, rehabilitation and employment, accident prevention and disability awareness.

The Ability People (TAP) is a Non-Profit, Non-Government and Disabled People's Organisation registered under the Societies Registration Act, People with Disability Act and the National Trust (Ministry of Social Justice & Empowerment, Govt. of India). It is a secular, apolitical and independent body founded to create a measurable and sustainable impact in the lives of under privileged communities in and around Visakhapatnam city in coastal Andhra Pradesh, India.

We partner with transnational/ national/ local companies, not-for-profit organizations, individuals, volunteers and others interested in bringing sustainable change in the lives of the people with disability in our community. We maintain global standards defined by WHO in selecting and partnering with organizations to ensure ethical behaviour, accountability, transparency, efficiency and effectiveness. The Ability People, Visakhapatnam is served by an active Board that consists of corporate representatives, eminent personalities, and executives from well known charitable organizations.

Message from the Director

Greetings From **“The Ability People (TAP)”!!!**
Namaste! Happy New Year and wish you all, the very best for 2022. We at The Ability People trust that you are having a fantastic and fabulous 2022. This year is turning out to be a real game-changer for us and we wish to express our deepest gratitude to you for all the good wishes and support. Hopefully, with the vaccination for children around the corner, things should get better soon and we should be able to resume our activities to the fullest.

Dilip Patro

Study finds 73% persons with disabilities facing severe difficulties post COVID crisis in India.
According to the report by the NCPEDP, financial constraints and restricted access to essential
items and healthcare services are key problems faced by them. India has a very large population of persons with disabilities. Persons with various loco-motor disabilities constitute a significant proportion of the population. Spinal Injury is one of the most common causes of loco-motor disability.

Mission, Vision, Our Objectives, Core values

Our Mission:
Minimise occurrence of disability in India and increase independent and productive life for persons with mobility disability especially for persons with Spinal Cord Injury.

Our Vision:
Road Safety consciousness and Social Justice for persons with mobility disability.

Our Aim:
Our organization initiated through the Ability Rehabilitation Center, active rehabilitation including sports, educational and vocational rehabilitation, for patients with spinal cord injury throughout India, beginning at Visakhapatnam. To do this well, we need to be connected with other professionals throughout Asia with expertise and experience in this area. We are also working with corporates & individuals for funding & volunteering to develop a model rehab center in Visakhapatnam.

Our Objectives:
1.Education
2.Awareness
3.Advocacy
4.Rehabilitation
5.Empowering persons with Mobility Disability

Our Values:
1. Inclusiveness.
2. Maintaining Global Standard.
3. Moral Consciousness
4. Service Orientation
5. Transparency and Accountability.

Our core team

Our Staff Our Strength

Rajasekhar Majji, CEO & Director, Raj is a serial entrepreneur, angel investor, mentor to start ups, experience in rural connect and research analytics. He is IIM Ahmedabad alumnus.

CASE SUTDY OF L CHAITANYA-A GIRL CHILD HAVING CEREBRAL PALSY

Children are just like flowers. It will be captivating if they blossom and spread their fragrance. But it's God's creation that some of them become differently abled and many times they lack the opportunity and support to spread their fragrance.

This case study is about L Chaitanya, a 6 year old girl child suffering from cerebral palsy disability. As a result she was unable to stand and walk. Her family with very poor background could not think of proper treatment.

The Ability People played a major role in reducing the risk factor and giving her a new hope of life. TAP diagnosed the requirement of Customised KAFO with Knee drop lock and provided the same with kind support form Concentrix.

Ultimately given proper care, therapy, gait training and Professional hand holding she became confident and stand with support. Her mother's joyous expression was really priceless at that moment. TAP team is in continuous touch with her. Currently she is doing great with constant improvement. We believe she can walk better in near future.

All these could happen because of the support from Concentrix and the tireless effort from The Ability People.

FROM BED TO MOBILITY- A Case of Master Shiak Dariya Sanavullo -a spinal cord injury patient

A tragic incident happened to the family of Mr Abdul Rahim, a chicken shop owner at Prakasham, Andhra Pradesh.

Mr Rahim with his 5 year old son Shaik Dariya Sanavullo faced a fatal road traffic accident in 2017. As a result Mr Rahim lost his life on the spot. The little child got severely injured and after fighting with death he recovered. Luckily the medical team saved Sana's life but he became a spinal cord injury patient and lost his mobility.

Now every responsibility came on Sana's mother Mrs Reshma Begum. Life was neither easy nor like before for her. But she kept her patience alive. Now her only dream was to provide smile on her son's face and to give him a good future. Reshma tried every treatment possible eventually the result was, Sana was unable to stand and walk.

Once they approached the " The Ability People", TAP plunged to action understanding and determining the course of the treatment. The Clinical team assessed thoroughly and detected that there was rotation of hip joint with a shortening of Rt leg and a weak hip. Understanding the criticality TAP decided to prescribe Bil HKAFO with walker. Fabricating the device was a challenging task and to fix it for him was difficult since it was the misalignment of the hip joint.

Concentrix was kind enough to sponsor the device. Sana with the help of the supportive device, is able to walk and stand like any individual and decided to re join the school as usual. Reshma the mother showered lots of gratitude, TAP was happy to see smile on both son's and mother's faces. TAP has taken every care on Sana to infuse strength and wished Success in near future. Mrs Reshma was grateful to the team TAP and thanked Concentrix for the enormous and timely support.

FROM SHADOW OF DARKNESS TO HOPE OF LIGHT- CASE STUDY OF MASTER SAKIR ALI-A CONGENITAL BILATERAL CTEV PATIENT

After having a baby son Mr Sabir Ali was to be genuinely happy, but it was unfortunately not like that. His child was having bilateral congenital CTEV, a deformity that affects the foot and ankle. If surgery would have been done or they would have taken any other treatment methods on time, there would have a been good outcome. But due to the parents negligence or due to lack of awareness, his deformity become fixed and his walking pattern totally changed as he was walking with the support of both his hands.

As time passed, his life became tough and pathetic. Up to age of 8 Sakir did not go to school. He was unable to enjoy his childhood like other children. When the team Ability People met him in a medical programme at Paderu, AP the team members shocked to see his condition. The poor father was so helpless. Then the team decided anyhow to make him stand. The team planned to provide him a custom made KAFO and took casting and proper measurement of the deformed leg. Now after fitment and proper training he is able to stand on his own. Though he is not completely fit ,still it will give him lots of strength day by day. In future if any surgery is required, then it will be more effective due to the usefulness of the assistive device. Now Sakir is going to school. He is enjoying school life with his new friends. Definitely all these positivity happened due to the effective contribution of both Concentrix and The Ability People. His father Mr Sabir Ali shows gratitude towards the support he get for his son.

THE STRUGGLE FOR LIFE- CASE STUDY OF N YAMINI JYOTSHNA -A GIRL CHILD WHO SUFFERS FROM CANCER

Future is so unpredictable. No one can say what it will bring in someone's life. Who had known a 4 year old girl child will suffer by cancer and will fight against the demon for her life.

Yamini the only daughter of her poor parents suddenly got cancer through her spine. Tear came to the eye when the clinical team of The Ability People met her at Homi Bhaba cancer hospital, Vizag. The struggle and pain she faced was really heart melting. After a proper discussion with the medical team we have decided to make her stand ,so that her recovery will be quicker.The clinical team took all the measurement at hospital bed only and fitted the KAFO with knee drop lock there too.

After giving proper instruction to the hospital staff that how to use the devices effectively and through the proper training she was able to stand now.

Gradually she is doing good and recovering day by day. Hope she will be totally cured soon. This positive change in the life of Yamini came due to the collective effort and support of Concentrix and The Ability People. The entire hospital team and her parents, have shown their gratitude to both the organization's.

THE SUFFERER GETS THE RIGHT SOLUTION - CASE STUDY OF MRS K CHANDRAMANI

A WORKING LADY HAVING PPRP. She had a deformity and was suffering from great pain. Everybody around her lost hope excepting her. She resolved to prove her self by hard work, dedication and courage to defeat the limitation.

K Chandramani, a 49 years old lady works in a school for special children. From her childhood she is affected by polio myelitis. There were so many problems but she proved herself and got a job. But as she became old life became so pathetic and painful. She was suffering from great knee and leg pain and unable to stand at all. Then she came to The Ability People office.

Here the clinical team did proper assessment and decided to prescribe Bil KAFO with KDL with proper modification as per her body and deformity level. After a proper fitment and gait training with the orthosis now she is able to stand and walk too. Now she is so happy with the device. Her pain is reduced. Her gait structure is also corrected. Now she is using a triwheeler scooter effectively to go to the office. Her life is so easy than before as she got the real solution to her problem. All these become possible only due to the collective effort of The Ability People and Concentrix. Mrs Chandramani shared her acknowledgement towards the valuable support of both the partner organizations. We are also wishing her a healthy and prosperous life.

Makavarapalem Clinical Assessment & Measurement Programme:

In one year we arranged 4 medical camps. In 2022 we went to Makavarapalem Medical Camp on 17/09/2022. The main aim of this medical camp was to take assessment, measurement & casting. Later we had done assessment, measurement & casting of 100 beneficiaries at makavarapalem. We took assessment of children & adults with different types of disabilities like CP, MR, Amputee, Locomotor disability.

Free assessment camp on eye related problems

In Oct -26 , one free assessment camp on eye related problems was conducted by TAP with the help of Vision Tree. In this programme, free eye test & distribution of specs to around 100 people were done. For this TAP expresses gratitude to Vision Tree for all its support. We also thank the invited doctor & technical team for their selfless services.

WORLD DISABILITY DAY 3rd DEC 2023

On Dec 3rd , World Disability Day was celebrated in the TAP office with so much joy & fun. In this function, commissioner of traffic & SDM ,LIC Visakhapatnam joined as the chief guest & guest of honor. Assessment & measurement of CwSN took place along with the distribution of different assistive devices. Our sincere thanks to all our guests, patients & donors.

DISTRIBUTION Of ASSISTIVE DEVICES FOR MAKAVARAPALEM MEDICAL CAMP HELD AT NARASIPATNAM.

We again arranged medical camp at Narasipatnam on 21th Dec 2022. For the delivery of devices like Prosthetics, Orthotics, positional devices and wheelchairs in the presence of Pettla Umashankar Ganesh,MLA.

Celebrating the 16th Anniversary of our Organisation

On the occasion of our 16th anniversary, we organized a programme on 22nd Feb 2023. We delivered assistive devices of 15 beneficiaries & also took Assessment, Measurements of new beneficiaries. We distributed the devices in the presence of the Additional Commissioner and the Assistant Director.

MARIKA MILLAR (MIBLOU) VISITS OUR ORGANIZATION

On 17th Feb 2023 Marika Millar mam visited the The Ability People (TAP) and she interacted with the staff members. She observed the beneficiaries & interacted with them. She discussed with the staff members, about the assessment devices, therapy and protocol of the ability people and she shared some valuable words with the staff members.

Organizational Updates

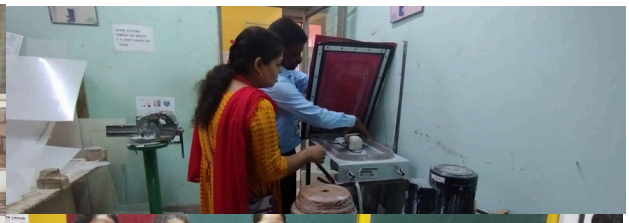

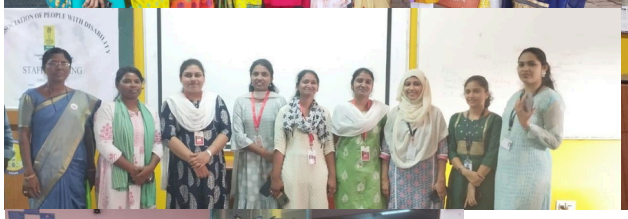

Early Intervention (EI) Training in APD (1st Phase)

On 11th Jan 2023 , 3 members of the TAP staff went to Bangalore for early Intervention Training in APD. The training session was attended by many people from different NGOS. This training was for 3 days.

Early Intervention (EI) Training in APD (2nd phase)

Four members form Tap attended the 2nd phase of EI Training. The members visited the Facility of Mobility India (MI) after completion of the training .

Essential Medical kit provided

We provided medical kit consisting of Adult Diapers, external Catheters, Urine bags, and Nelton catheters to 50 beneficiaries form poor families with Spinal Cord Injury or patients who are bed ridden and those who are Wheel Chair users.

DONATION OF ASSISTIVE & DEVELOPMENTAL AIDS BY HP SHAKTI LADIES CLUB ON 8th DEC

On this day a team of members from HP Shakti Ladies Club , Visakhapatnam visited our center. They donated positional devices & orthotics for needy children. They also supported rations for the poor. We pay our heartfelt thanks to all the team members of HP Shakti Ladies Club.
