On a drive to make city accident-free

- G.S. SUBRAHMANYAM

Traffic police to organise awareness campaign in schools. Global studies have shown that the road crashes are predictable and preventable.

Road safety is not achieved through enforcement of laws, but requires everyone to work to prevent it. The Police and the Transport departments can enforce law and take punitive action against violators of law, but nothing can be done when citizens callously viola become potential traffic hazards.

Global studies have shown that the road crashes are predictable and preventable. It only takes a split second decision to save a life, yours, director of The Ability People Dilip Patro said. Implementation of road safety rules requires change in mindset from reactive proactive. The Ability People, working for the rehabilitation of accident victims, is trying to create a more inclusive campaign on roa he added.

“What is required is educating everyone right from the school level on the road rules. By educating housewives on the traffic laws w ensure that the children do not become traffic law violators,” former Vice-Chancellor of Acharya Nagarjuna University V. Balamoha noted. Chaitanya Engineering College Principal M. Ramjee promised support in taking up training programmes.

The traffic police have listed out all the schools in their jurisdiction and have drawn up a calendar to organise traffic awareness cam each school. It is difficult to cover all the schools in a year and there are schools carried over to the next year and so priority is given conduct such campaigns in schools not covered so far. “We have asked the VUDA to revive the Traffic Park and it will become funct That would help us improve traffic education in the city,” ADCP (traffic) Kinjarapu Prabhakar said.

“Road users should understand that roads are meant for carriageway and parking is allowed only in areas with parking sign. Wrong vehicles pose a threat to every other road user,” he added.

Barricades

The temporary barricades on the road are placed with a purpose and the road users should not remove them to suit their convenien barriers not only bring down the speed of the vehicle but also provide safety to other road users, Buchi Raju, MVI, explained partici an open house discussion at the TAP rehabilitation centre for accident victims.
