Hand washing with soap is a st-effective preventive alth initiative. The ap-oach has proven to decrease risk of not only diarrhoea also severe diseases such cholera and dysentery by o 59 per cent besides pre-ting pneumonia, skin dis-

Dr. Rao stated.

Dr. Rao appealed to medical and paramedical staff, schools and college managements,

social workers, public sector undertakings, factory workers, media and others to make the campaign on hand wash a grand success.

Training in use of callipers begins today

Special Correspondent

VISAKHAPATNAM: The Ability People in association with Mobility India, Bangalore will conduct a three-day camp to present high quality and low weight artificial limbs and callipers and train the beneficiaries on how to use them here from Wednesday.The Ability People member Dilip Patro said therapists and experts in the field from Mobility India would attend the camp. A screening and assessment camp was conducted in the city on July 28.

The Ability People

The Ability People is an NGO involved in creating awareness among physically challenged persons on how to lead a near-normal life by making use of physiotherapy, wheelchairs, high quality artificial limbs and callipers.
